Styled paragraphs allow drawing ^{superscript} and _{subscript} text chunks.

Subscript and superscript text can be _underlined_ or turned into _{link} annotations.

Let's see if subscript and superscript text is properly wrapped into lines. ^{This is some superscript text which should not fit on the current line.} And then some regular text again to also test subscripts. _{This is some subscript text which should not fit on the current line.} And then some regular text again.
